

# solutions COMPARISON

As distance learning and multimedia classroom experts, ST Concepts has developed a full range of solutions to meet any need or budget.

## st mobile conferencing system

Given today's ever-changing educational, government, and corporate climates, technology solutions must be flexible. It is for this reason that ST Concepts developed the ST Mobile Conferencing System. The ST Mobile Conferencing System allows organizations to move their video conferences from room to room as necessary, with no complicated setup.

## st multimedia presentation system

Effectively presenting a message to an audience is never an easy task, which is why your presentational technology can not be an obstacle. At the push of a button, the ST Multimedia Presentation System will allow the end user to display a computer presentation, VCR, DVD or document camera on a 100 inch projection screen with high resolution quality.

## st virtual learning system

The ST Virtual Learning System is a robust instructional technology tool that offers instructors a full range of technology tools at their finger tips through our patented ST interface. The ST Virtual Learning System is the most scalable technology solution we offer, allowing many of its resources to be shared between multiple rooms.

## st super teaching

Our premier multimedia/distance learning system, Super Teaching uses whole brain instruction to accelerate learning by engaging both hemispheres of the brain simultaneously. Integrating a full gamut of multimedia technologies, Super Teaching utilizes three large screens to create an engaging environment.
