

super teaching

learning at the speed of thought

Super Teaching is the most advanced, revolutionary educational technology created to improve instruction and comprehension. Using whole brain instruction, Super Teaching accelerates learning by engaging both hemispheres of

the brain simultaneously. The Super Teaching system impacts the concentration of each student by varying multimedia patterns on three large screens. In addition, Super Teaching seamlessly integrates a broad spectrum of technologies such as CD-Rom, DVD, interactive media, web-based content, cable TV, student response systems, and distance learning, and yet is so easy to use that anyone can operate it.

the benefits of superteaching

As An Instructor

- Easy to use
- Highly Automated
- Able to incorporate any existing presentation applications including Microsoft PowerPoint, Hyperstudio, Macromedia Director, etc.
- Minimal training required
- Effective with any content
