

Learning Solution ST Virtual Learning System

From ST Concepts, Inc.

Distance learning technologies can create unique learning opportunities for students, improve communication in corporate environments, and make government more effective. Unfortunately, many distance learning solutions are extremely complicated, difficult to use, unreliable, and are expensive to purchase and maintain. ST Concepts, a leader in technology integration and distance learning technologies, has developed a cost effective, tightly integrated, easy-to-operate distance learning solutions for schools, government organizations, and corporate environments: the ST Virtual Learning System.

With the ST Virtual Learning System, educators can operate their audio/video or computer presentations, retrieve files from the network server, access the internet, control audio levels of all media devices and connect a video conference all from a simple ST touch screen panel located on their desk or lectern. Microphones and robotic cameras will draw students into the presentation and elevate levels of concentration and focus. Instructors and business professional can broadcast their presentations in real-time for distance learning and for virtual meetings on demand. All classes and business meetings can be recorded and then be video streamed anywhere in the world where there is internet access.

ST Concepts, Inc. has a professional staff with years of experience in designing and installing multimedia and distance learning systems in K-12 schools, higher education, courtrooms, corporate rooms, and businesses.

Features

- Multipoint Conferencing
- Streaming Media
- Multi-Media Presentation Including:
 - VCR
 - DVD
 - Cable TV
 - Computer
 - Document Camera
 - Internet
- High fidelity sound system
- Wireless Microphone
- LCD Digital High Resolution Projection System
- Robotic Cameras
- Professional Development for
 - Teacher
 - Operators
 - Technical Support Personal
- ST Control Software
- Intuitive Operating System
- Customized Presentation Desk or Podium
- Professional Installation
- Prompt Service
- One-Year Full Warranty
- Maintenance Agreements for Up to Five Years

Applications

- Improved Lines of Communication
- Dual Enrollment for High School Students
